

ifit®

The expanded ifit® buccal tube line from American Orthodontics features the ultimate combination of functionality, simplicity, and patient comfort.

ifit 1st Molar

- Blends functionality and convenience with patient comfort
- 4.5mm Mesial Distal width

ifit 2nd Molar

- Easy to place, low profile tube
- Distal extension provides additional hook area on tubes with 10° rotation
- 3.2mm Mesial Distal width

ifit Convertible

- One-piece convertible with a web-like featured cap
 - Stays in place when in treatment, easily converts when needed
- Tie-wing undercuts that accommodate all elastomerics
- 3.9mm Mesial Distal width

ifit Mini 2nd Molar

- Wraparound Pad which can be used for partially erupted molars
- 2.5mm Mesial Distal width

Color Coding

Quadrant color coding ensures accurate tooth identification

Placement Line

Provide excellent reference to the desired occlusal plane

Longer Hook

Provides ease of elastomeric placement

Tweezer Guides

Allow accurate, non-slip delivery to posterior teeth

Centered Funnel Entrance

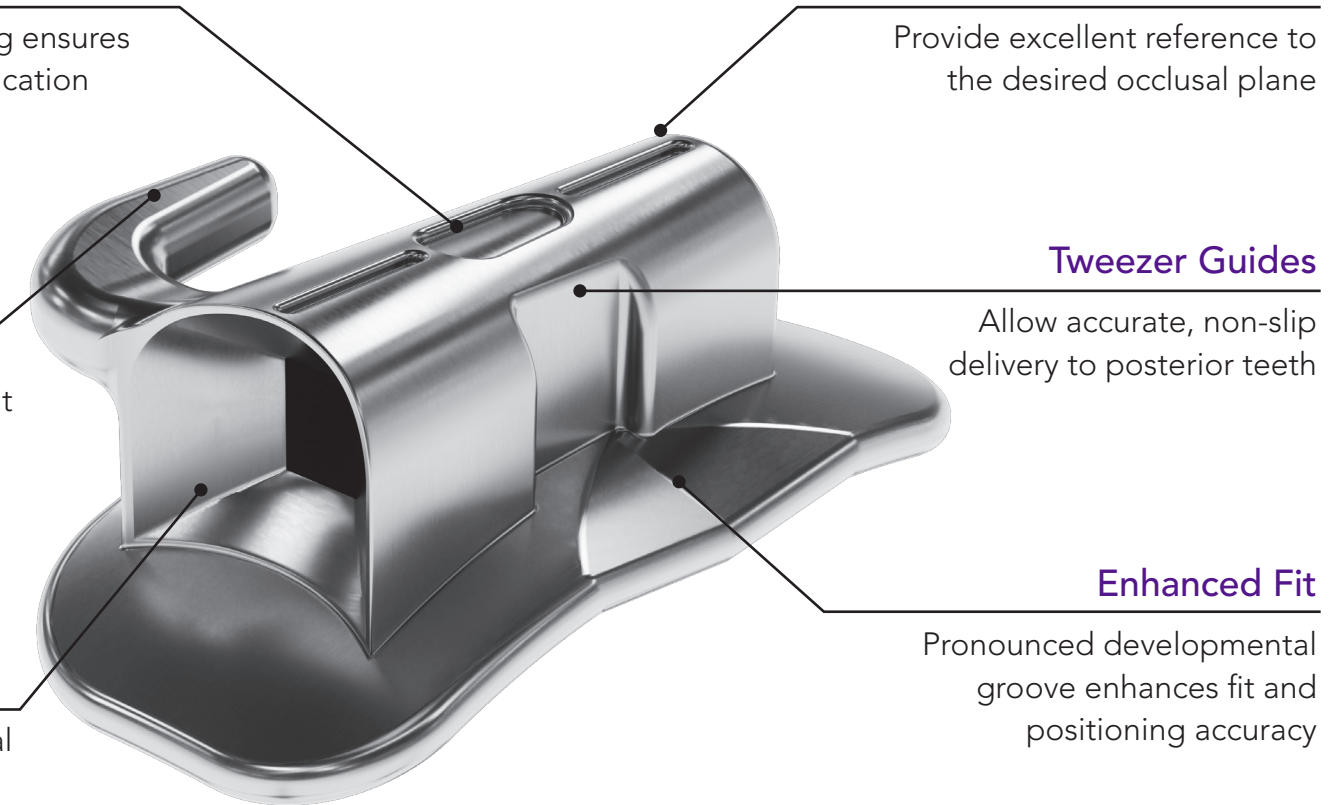

Large, centered mesial entrance facilitates easy wire insertion

Enhanced Fit

Pronounced developmental groove enhances fit and positioning accuracy

Enhanced Bonding

Dual Mechanical retention bonding pad incorporates micro-roughened 80 gauge mesh over a photo-etched foil base for exceptional bond strength
